Pros & Cons

Pros: Operating profit margin above 25% indicates strong pricing power and cost discipline, Net profit compounding at above 20% over 5 years creates significant shareholder value, Earnings per share growing above 15% CAGR indicates strong earnings quality and compounding, Revenue growing slower than profits shows improving operating leverage and scale benefits
Cons: Debt-to-equity ratio of 8.25 is elevated for a non-financial company and warrants monitoring, Return on capital employed below 10% suggests the business is not generating sufficient returns on invested capital, Net debt exceeding 3 times EBITDA is a high leverage ratio and limits financial flexibility
